

Foamlce™

Nicros Foamlce™ allows you to bring the thrill of ice climbing into the comfort of your indoor facility. Nicros Foamlce™ is ideal for pre-season training or as a great way to extend your ice climbing season. Foamlce™ panels are easily installed on any flat climbing surface and can be custom cut to fit your space requirements.

TRAIN. CLIMB. REPEAT.

FOAMICE™ DESCRIPTION

Nicros FoamIce™ is a light-weight, high density, 2'x9', 9.5 pound foam panel ice climbing system that comes with mounting hardware and an installation manual.

FOAMICE™ BENEFITS

- FoamIce™ is a durable, high-strength, solid extruded product.
- FoamIce™ meets the requirements of the U.S. Clean Air Act Amendments. It is easily fabricated, impervious to most chemicals, non-abrasive and performs consistently over a wide range of temperatures.
- FoamIce™ is also reusable and completely recyclable because it is made of non-crosslinked material.

FLAMMABILITY

FoamIce™ has successfully passed FMVSS 302 flammability testing, conducted according to the U.S. Code of Federal Regulations, CFR 49.

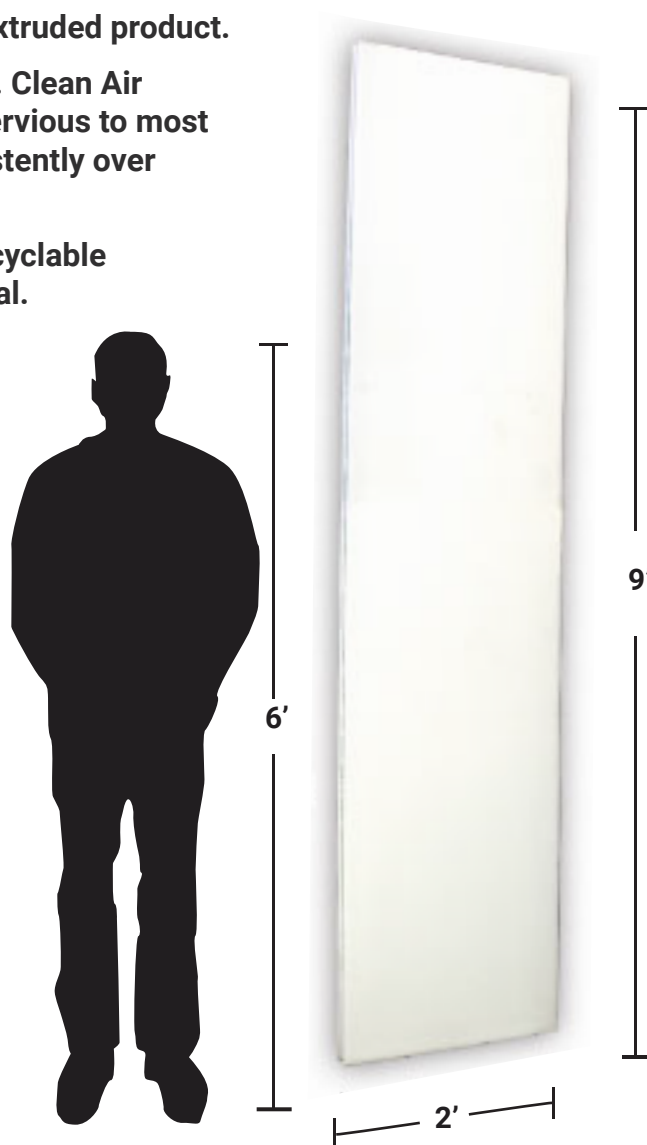

SIZES AVAILABLE

24" x 108" x 2" thick panels
